

END OF PROGRAM LEARNING OUTCOMES
Doctor of Nursing Practice

Approved December 2024

1. Synthesize advanced nursing knowledge and interdisciplinary insight to refine clinical judgment and drive transformative innovation in practice.
2. Design and evaluate complex person-centered care that is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate.
3. Lead and evaluate advanced population health interventions across the life span, from prevention to disease management, collaborating with both traditional and non-traditional partners from communities, public health, industry, academia, health care, local government entities, and others for the improvement of equitable population health outcomes.
4. Lead the ethical generation, translation, and dissemination of nursing knowledge to transform health care practices.
5. Design and lead quality and safety initiatives to enhance quality and minimize risk of harm to patients and providers through both system effectiveness and individual performance.
6. Model interprofessional collaboration with care team members, patients, families, communities, and others to optimize care, enhance the healthcare experience, and strengthen outcomes.
7. Design and evaluate the coordination of resources within complex systems of health care to improve the delivery of safe, quality, and equitable care to diverse populations.
8. Lead the integration of Information and communication technologies to transform clinical practice, optimize decision making and advance the quality and efficiency of healthcare services in accordance with best practice and professional and regulatory standards.
9. Model and promote a professional identity that embodies advocacy, accountability, civility, collaborative disposition, commitment to ethical practice, and behaviors that reflects nursing's characteristics and values.
10. Develop and direct initiatives that promote self-reflection, personal health, resilience, and well-being, contribute to lifelong learning and professional growth, and influence healthcare expertise and leadership.
