

## CSUF School of Nursing Program Notice of COVID-19 Vaccination

The CSUF School of Nursing Program (Program) does not require students be vaccinated against COVID-19. However, the Program recommends that all students, except those who have medical contraindications, receive the most current COVID-19 vaccine recommended by the Centers for Disease Control & Prevention (CDC).

Please check why, as of the date you signed this Notice, you have not received the most current COVID-19 vaccine recommended by the CDC.

- ☐ I have a medical contraindication that would result in a severe allergic reaction to an ingredient in a COVID-19 vaccine or have had a reaction to prior COVID-19 vaccines.
- ☐ I have a history of myocarditis and/or pericarditis following vaccination with an mRNA vaccine.
- ☐ Due to some other medical condition.
- ☐ Due to a sincerely held religious or similar belief.
- ☐ Other.

As a student in the Program I understand, acknowledge and agree to the following:

1. I am signing this Notice because as of the date noted below, I have not received the most current COVID-19 vaccine recommended by the CDC.
2. I agree to follow all COVID-19 requirements (as defined by the CDPH and/or clinical site policy) of the clinical sites where I am placed related to or associated with my COVID-19 vaccination status noted above. I understand that this may include (a) wearing a mask at all times while at the clinical site and (b) purchasing additional screening or equipment the costs of which will be at my own expense.
3. If I seek placement at a clinical site that does not require the most current COVID-19 vaccine recommended by the CDC, I must submit a request and any required documentation to the Clinical Placement Team when I enter the Program. My request will be processed in the order of when completed requests are received.
4. Although the Program will attempt to place me at a clinical site that does not require the most current COVID-19 vaccine recommended by the CDC, it cannot guarantee me an alternative placement.

5. My failure to timely complete all Program requirements may impact my ability to complete a clinical assignment and/or delay my progression in the Program.
6. If there is no clinical site available, then I may not be able to fulfill the clinical requirements of the Program, which may delay my graduation and/or lead to my removal from the Program due to my failure to complete the requirements for graduation.
7. If I receive the most current COVID-19 vaccine recommended by the CDC, I will inform the Program as this may increase the likelihood of a successful placement at a clinical site.
